Re: RODRIGUEZ, HEINS

DOB: [REDACTED]

The patient was seen on September 17, 2018

Chief Complaint: [REDACTED] year-old male with intermittent headaches, occasional dizziness, persistent memory and cognitive difficulties.

Neurological Examination: The patient remains bradyphrenic. He had difficulty with tasks requiring sustained attention, concentration, and memory.

Lab Data:

- The patient's score on headache disability index was 28%.
- EEG was unremarkable.

Impression: Traumatic brain injury.

Recommendations:

- Cognitive remediation therapy as per the recommendation of the neuropsychologist.
- Sumatriptan 100 mg p.o. b.i.d. p.r.n. headaches.
- Followup evaluation in two months.

Disability: The patient continues to work on a part-time basis. He came to the office today driving his own vehicle.
